Top quality products for floors

Chimiver Panseri is a family company based in Pontida, Northern Italy, and has operated for over 50 years in the development and production of chemistry for the wooden floor sector and in the latest years as also approached with excellent results different sector like adhesive for resilient and lacquers for resin treatments. The range is extensive and varied, but always of high quality. Chimiver also produces wide range of UV products for industry, supplying European leading producers of engineered pre-finished parquet, offering excellent service and technical assistance pre/post sales. Permanent efforts in research & development and continuous improvements in technology always lead to creation of last generation and environment friendly products. Ethics and commitment of management and personnel are other distinguishing features of Chimiver.

The real and specific needs of the user have guided our every technological choice aimed at ensuring, for each product, the maximum of consistent quality. For this reason, Chimiver has made major investment into new highly automated plants with selective control throughout the entire productive process. Chimiver's ability to forestall and anticipate demand is a quality that marks each of its products.

NEVIO PANSERI,
MANAGING DIRECTOR CHIMIVER

The new look of Care Line

Prosecuting in his multi-year investments plan involving the whole range of eco-friendly products, at the beginning of 2018 Chimiver launched the brand new look of his original Care Line, unveiling the innovative and charming packaging, caps, labels as well as the futuristic display with LCD monitor running company videos, cleaning demos and Care Line Point images. That is the outcome of a long and accurate observation of the most advanced worldwide marketing and merchandising methods, representing a unique sales tools for innovative showrooms willing to offer a quality service to final customers who will be able to chose cleaning and sanitizing products for wooden floors (both lacquered and oiled), for laminate, vinyl, LVT, resin, and ceramic surfaces and outdoor decking.
