

# ERBA SEMPRE VERDE

Coloring solution for natural grass

## Description

ERBA SEMPRE VERDE is a non-toxic water-soluble dye for coloring natural lawns that died from drought or cold weather. It can be used all year round.

## Characteristics

Mixture ratio	single-component
Colour	green
Application temperature	+10°C ÷ +35°C
Application	spray
Coverage	20 m <sup>2</sup> /L (ready to use)
Thinning	1:10 with water
Drying time to touch	around 24h
Packaging	0,5 L
Storage stability	12 months <sup>(1)</sup>
Tool cleaning	water

1 in original sealed containers at temperatures between +10°C and +25°C

## How to use

Cut your lawn at desired height and, when grass is dry, apply ERBA SEMPRE VERDE.

Dilute 1:10 with water; reduce water dilution when a more intense green color is required (preliminary test is suggested). In order to reduce foam formation, we suggest to add water slowly.

Spray the product on the surface try to spreading and unforming on the whole length of the grass. If more intense coloration is needed, apply a second coat only once the first one is dry.

Your lawn can be walked the day after (verify that the color on grass is dry).

The color is lasting about 2-4 weeks. Rain is reducing life time.

ATTENTION: The product can stain indelibly any kind of surface.

## Warnings

Keep away from children. Do not swallow. Do not inhale. Avoid contact with eyes.

## Label elements

· Safety data sheet available on request. Contains Mixture of: 5-chloro-2-methyl-2H-isothiazol-3-one; 2-methyl-2H-isothiazol-3-one (3: 1). May produce an allergic reaction.
