PARKETTKOLL LISTONI

Single-component vinyl adhesive in water dispersion with low water content

¤Description

PARKETTKOLL LISTONI is a single-component vinyl adhesive formulated with resins in water dispersion for laying of high thickness solid wooden floors. In many situations PARKETTKOLL LISTONI can take the place of a two-component adhesive. Its special feature is the very low content of water, which makes it ideal for firm sticking, without the usual defect of lateral "push". Moreover the plastification of the polymers present in formulation is very carefully looked after, so as to guarantee to the glue's film a lasting "intrinsic elasticity".

¤Characteristics

-Cildi decel iseles	
Mixture ratio	single-component
Application temperature	+10°C ÷ +25°C
Application	notched trowel n. 5
Pot-Life	n.a.
Maximum open time	20' (1)
Hardening	3-4 days ⁽¹⁾
Coverage	900-1300 g/m² depending on the
	subfloor.
Colour	oak, walnut, afrormosia
Storage stability	1 year ⁽²⁾
Packaging	10 kg - 20 kg
Tool cleaning	Water (before the hardening of the
	adhesive)
1 at 20°C and 65% R.H.	

in original sealed containers at temperatures between +10°C and +25°C

¤Laying conditions

♦ Subfloor

dry, clean, no-dust creating, not too rough.

♦ Humidity of subfloor

2,0% max with cement subfloors.

♦ Wood humidity

9±2%

#How to use

Spread PARKETTKOLL LISTONI with a notched trowel uniformly on a clean subfloor embodying possible dust present on it. Perfect adhesion to the subfloor is ensured if at least 65% of each wooden component is in direct contact with the adhesive. Highly absorbent and dust-creating surfaces are to be pre-treated with PRYMER W diluted in the ratio of 1 to 5 with water (see technical data sheet). Before the freshly spread glue hardens on the top forming a film, lay the wood tiles, that must be set and "beaten" uniformly so that the adhesive adheres to the whole surface of the wood. The subsequent sanding must be operated not earlier than 10 days after the laying of the wooden floor.

¤Label elements

· Safety data sheet available on request. Contains Mixture of: 5-chloro-2-methyl-2H-isothiazol-3-one; 2-methyl-2H-isothiazol-3-one (3: 1). May produce an allergic reaction.
